March 27, 2018

Mr. George D. Noewatne
Director of Public Works & Engineering
Town Of Cheshire-DPW
84 South Main Street
Cheshire, CT 06410

Subject: Lead XRF Testing in Men's & Women's bathrooms of Quinnipiac Park located at
1325 Cheshire Street, Cheshire, CT

Dear Mr. Noewatne,

This letter is in response to lead testing at above referenced facility to characterize construction waste in adherence with State of CT Department of Environmental Protection regulations. On March 6 of 2018, I conducted lead screening of above referenced areas using RMD LPA-1 X-ray fluorescence (XRF) lead paint analyzer (Serial No. 3128). All painted surfaces tested were found not to contain toxic level of lead, i.e. less than 1 mg/cm². Because all the painted surfaces tested contained lead in between -0.2 to 0.4 mg/cm², the waste is exempted from Toxicity Characteristics Leaching Procedure (TCLP-lead) testing and therefore can be disposed of as regular construction waste.

Crew engaged in renovation and demolition activity including disturbance of plaster shall adhere to OSHA construction industry standard codified under 29 CFR 1926.62.

Please feel free to call me at (203) 623-3086 if you have any question or require clarification on the above.

Sincerely,

Vidya N. Trivedi
